QA TEST PLAN · QA SCHEDULED

Payee, Cash Expense & Mail Document — V4 View Page Redesign

QA task OCW-24254 · Dev task OCW-24008 · Zil Money V4 (new version) · 26 Sep 2026

> **Purpose:** define what will be tested, how, with which data and by when, so the redesigned Payee, Cash Expense, Document Mail and Document Mail History view pages can be verified against the UX design — including font size, font weight and responsive behaviour — without any change to existing business logic.

1. Task summary

QA Task	OCW-24254 — QA Scheduled — Payee, Cash Expense & Mail Document
Development Task	OCW-24008 — Payee, Cash Expense & Mail Document (view page design update)
Modules	Payee · Cash Expense · Document Mail · Document Mail History
Interface	Zil Money V4 (new version) — list pages and view (detail) panels
Design Reference	ViewPanels-Latest (View Panel Modernization) — Cash Expense View Panel, states S1–S6; /v4-detail-panel; Payment Out and Payment In view pages
Status	**Pending**

2. Objective

OCW-24008 updates the view (detail) pages of Payee, Cash Expense, Document Mail and Document Mail History to the latest V4 UX design, using the existing /v4-detail-panel implementation and the Payment Out / Payment In view pages as the reference pattern. QA will confirm that each page matches the design in layout, typography (font family, size and weight), colour tokens, spacing, actions and panel interactions; that the pages behave correctly across desktop, tablet and mobile widths and in dark mode; and that no business logic, API behaviour or existing functionality has changed. Anything that differs between the ticket, the design file and the build is raised as an open point rather than resolved silently.

3. Test scope

3.1 In scope

Page	List / page component	View (detail) component	Design source
Payee	payee-list-v4, payee-ocw-v4, payee-data-table-v4 (modules/payee/payee-v4/)	payee-details-v4	/v4-detail-panel + Payment Out / In pattern
Cash Expense	cash-expense-v4-main, cash-expense-list-v4 (modules/cash-expense-v4/)	cash-expense-detail-panel-v4	Design file — Cash Expense View Panel S1–S6
Document Mail	document-mail-list-v4 (business-tools/document-mail/v4-document-mail/)	document-mail-detail-panel-v4	/v4-detail-panel + Payment Out / In pattern
Document Mail History	v4-document-mail-history — route mailing-dashboard/document-mail-history	No separate view component	Page-level V4 consistency only

Checks applied to every page in scope:

- Opening and closing the view panel from the list (eye icon, row action, Close button, Escape key, overlay click).
- Panel header — record icon, primary value, type/status badge, meta line, action buttons, More actions menu, Expand/Collapse and Close.
- Detail cards — title, collapse/expand, label/value rows, highlighted total row, summary card.
- Tile row — Activity log, Comments, Attachments, Last 10 transactions (or the page's equivalent tiles) and the content each tile shows.
- Typography — font family, font size, font weight, colour, letter-spacing and text-transform against the UX design.
- Spacing, border radius, button heights and alignment against the UX design.
- States — loading skeleton, initial, validation, empty, expanded, dark compact and dark expanded.
- Responsive behaviour at desktop, laptop, tablet and mobile widths (1920, 1536, 1280, 1024, 768 and 390px).
- Consistency with the Payment Out and Payment In view pages.

3.2 Out of scope

- Business logic, API contracts and calculations — verified only as regression (values unchanged), not re-tested functionally.
- The other view panels in the design file — Bills, Check Draft, Customer, Deposit Slip, International Payment, Invoice and Support Ticket.
- Classic version pages for these modules.
- Back-end processing of Document Mail (printing, postage, dispatch).

4. Acceptance criteria

Derived from the Implementation Guidelines in OCW-24008.

ID	Acceptance criterion
AC01	Payee, Cash Expense, Document Mail and Document Mail History view pages follow the latest UX design and UI specification from the linked UX task.
AC02	The detail/view-page structure and behaviour match the existing /v4-detail-panel implementation.
AC03	The pages are consistent with the existing Payment Out and Payment In view pages.
AC04	Existing V4 components and layout patterns are reused — no duplicate UI implementation (buttons, badges, cards, tiles, tables look and behave identically).
AC05	Spacing, typography, actions, responsive behaviour and detail-panel interactions are consistent across the V4 experience.
AC06	Existing business logic, API behaviour and functionality are unchanged.

5. Test approach

- **Design comparison:** place each built panel next to the matching design frame (S1 Loading, S2 Initial, S3 Validation, S4 Expanded, S5 Dark compact, S6 Dark expanded) at 1536 × 840 and compare layout, order and content.
- **Typography and spacing:** inspect each element in DevTools → Computed and record font-family, font-size, font-weight, colour, line-height, padding and border-radius against the design frames.

- **Responsive:** Chrome DevTools device toolbar at 1920, 1536, 1280, 1024, 768 and 390px, plus a live resize from 1920px down to 390px to catch breakpoints between them.
- **Pattern consistency:** open Payment Out and Payment In view pages side by side with each page in scope and confirm the shared components are identical.
- **Regression:** compare every value shown in the old and new view pages for the same record; exercise every action once to confirm it still works.
- **Browsers:** Chrome (primary), Edge, Firefox and Safari — to confirm against the supported browser list.
- **Payee and Document Mail:** the design file contains no Payee or Document Mail panel, so these pages are tested against the /v4-detail-panel pattern and the Cash Expense typography baseline.

6. Test cases

Common panel cases (6.1–6.3) are executed on Payee, Cash Expense and Document Mail. Status is Not tested until execution.

6.1 View panel — open, close and layout (all view pages)

ID	Test Scenario	Expected Result	Status
TC01	Click the view (eye) icon on a list row	View panel slides in from the right with the correct record; list stays visible behind a dimmed overlay	Not tested
TC02	Click Close (×) in the panel header	Panel closes; list returns to its previous scroll position and filters	Not tested
TC03	Press Escape with the panel open	Panel closes; any open More actions menu closes with it	Not tested
TC04	Click the dimmed overlay outside the panel	Behaviour matches Payment Out / Payment In view pages (close or stay open, same as reference)	Not tested
TC05	Open a record while the transaction is still loading	Loading state S1: header, actions and cards show pulsing skeletons; only Close is active	Not tested
TC06	Compare the loaded panel with design frame S2 at 1536 × 840	Header, action row, detail card, summary card and tile row appear in the same order, spacing and alignment as the design	Not tested
TC07	Click Expand (⤢) in the panel header	Drawer widens to 60% (minimum 960px); cards show in two columns; tile row spans full width; icon changes to Collapse	Not tested
TC08	Click Collapse in expanded mode	Drawer returns to compact width and stacked cards	Not tested
TC09	Expand the panel, reload the page and reopen a record	Panel reopens in expanded mode (preference remembered)	Not tested
TC10	Open a different record while the panel is open	Panel content switches to the new record without stale data from the previous one	Not tested

6.2 Panel header and actions (all view pages)

ID	Test Scenario	Expected Result	Status
TC11	Check header primary value and badge	Primary value (amount or name) and type/status badge show the correct record data and badge colour for its type	Not tested

ID	Test Scenario	Expected Result	Status
TC12	Check header meta line	Labels (Payee:, Account:, date) in muted grey; values in dark semibold; date and time in MM/DD/YYYY hh:mm am/pm	Not tested
TC13	Check action buttons (e.g. Clone, Get receipt, Send proof)	Outlined navy buttons, 32px high, 12px radius, icon + label; same component as Payment Out / Payment In	Not tested
TC14	Click each header action button	Each action performs its existing function (same result as before the redesign)	Not tested
TC15	Click More actions (⋮)	ACTIONS menu opens with the page's existing actions (Cash Expense: Edit, Print, Download PDF, Delete — Delete in red)	Not tested
TC16	Click outside the More actions menu	Menu closes without triggering an action	Not tested
TC17	Click Delete from More actions	Existing confirmation dialog appears; record deleted only after confirmation; panel closes and list refreshes	Not tested
TC18	Hover and focus each header button	Hover and keyboard focus states are visible and match the V4 button component	Not tested

6.3 Detail cards and tiles (all view pages)

ID	Test Scenario	Expected Result	Status
TC19	Check label/value rows in the detail card	Labels left-aligned in grey, values right-aligned in dark semibold; thin divider between rows	Not tested
TC20	Check a multi-line value (e.g. bank/cash account address)	Name on first line in semibold; address lines below in regular weight, right-aligned	Not tested
TC21	Check the highlighted total row	Total label and amount in navy on a tinted block; amount in Funnel Display 14px bold	Not tested
TC22	Click the card title chevron	Card collapses to its header; clicking again expands it; other cards unaffected	Not tested
TC23	Check the tile row on open	Activity log tile selected by default (navy border, tinted fill); other tiles white with grey border	Not tested
TC24	Click each tile	Only the clicked tile is selected; its content loads below the tile row	Not tested
TC25	Activity log tile	Table shows #, Date (date + time sub-line), Status, By, Device, Notes for every logged event	Not tested
TC26	Comments tile — post a valid comment	Comment is appended to the list with author and time; input clears	Not tested
TC27	Attachments tile	Each file shows icon, name, size · uploader · date, with Download and Delete icons; Upload attachment button visible	Not tested
TC28	Last 10 transactions tile	Up to 10 most recent transactions with #, Date, A/C, Memo, Type badge (Expense violet / Income green), Amount	Not tested

6.4 Page-specific checks

ID	Test Scenario	Expected Result	Status
TC29	Cash Expense — Cash expense details card	Shows Bank/cash account with address, Bank, Total items, Grand total, Date, Serial no, Category and highlighted Total cash	Not tested
TC30	Cash Expense — Payee summary card	Shows Total paid this month, Total paid this year and highlighted Total paid (all time); values match the payee's transactions	Not tested
TC31	Cash Expense — header	Purple wallet icon, amount, Expense/Income badge, Payee and Account on the meta line	Not tested
TC32	Payee — view panel	payee-details-v4 opens in the /v4-detail-panel pattern: header, action row, detail cards and tiles in the same structure as Payment Out	Not tested
TC33	Payee — all existing fields	Every field shown on the previous Payee view page is present in the new panel with the same value	Not tested
TC34	Payee — list page	payee-list-v4 / payee-data-table-v4 open the panel from the row action; list layout unchanged apart from the design update	Not tested
TC35	Document Mail — view panel	document-mail-detail-panel-v4 opens in the /v4-detail-panel pattern with mail status badge and existing mail details	Not tested
TC36	Document Mail — all existing fields and actions	Every field and action on the previous Document Mail view is present and works (e.g. view/download document)	Not tested
TC37	Document Mail History — page	mailing-dashboard/document-mail-history loads with V4 spacing, typography and table styling consistent with the other pages	Not tested
TC38	Document Mail History — no view panel	Rows behave as before (no new panel introduced unless the UX task says so)	Not tested

6.5 Typography — font size and font weight

ID	Test Scenario	Expected Result	Status
TC39	Check fonts loaded	Funnel Display used for amounts/values; Plus Jakarta Sans for all other text; no fallback system font	Not tested
TC40	Header primary value	Funnel Display, 17px, weight 700, #111827	Not tested
TC41	Header meta label vs value	Label 10px / 400 / #6B7280; value 10px / 600 / #111827	Not tested
TC42	Action button labels	10.5px, weight 600, #20319D	Not tested
TC43	Card titles	11px, weight 700, #111827	Not tested
TC44	Row label vs row value	Label 10px / 400 / #6B7280; value 10.5px / 600 / #111827	Not tested
TC45	Highlighted and summary totals	Total cash label 10.5px/700, amount Funnel Display 14px/700; Total paid (all time) label 11px/700, amount 15px/700 — all #20319D	Not tested

ID	Test Scenario	Expected Result	Status
TC46	Tile labels	9px, weight 600; #20319D when selected, #4B5563 when not	Not tested
TC47	Table header and cells	Header 9.5px / 700 / uppercase / 0.38px letter-spacing / #6B7280; cells 10.5px / 400; time sub-line 9px	Not tested
TC48	Validation and empty-state text	Error 10px / 600 / #EB2E2E; empty title 11px / 700; empty sub-text 10px / 400	Not tested
TC49	Same element on all three view pages	Font size and weight identical for the same element across Payee, Cash Expense, Document Mail and Payment Out / In	Not tested

6.6 Responsive behaviour

ID	Test Scenario	Expected Result	Status
TC50	1920 × 1080 — compact drawer	Drawer width capped at 640px; content not stretched	Not tested
TC51	1536 × 840 — compact drawer	Drawer ≈ 34vw (≈ 522px); matches design frame S2	Not tested
TC52	1280 × 800 — compact drawer	Drawer at 460px minimum; header actions stay on one row; no text clipped	Not tested
TC53	1024 × 768 — expanded drawer	Expanded drawer at 960px minimum; two-column cards; four tiles in one row	Not tested
TC54	768 × 1024 — tablet portrait	Compact drawer 460px; expanded fills viewport; no horizontal page scroll	Not tested
TC55	390 × 844 — mobile	Drawer full width; header, actions and cards readable; Close and Expand reachable	Not tested
TC56	390 × 844 — Last 10 transactions / Activity log	Wide tables scroll horizontally inside the tile; page itself does not scroll sideways	Not tested
TC57	Long values at narrow widths (long payee name, long address)	Text wraps or truncates with ellipsis without overlapping neighbouring fields	Not tested
TC58	Resize the window with the panel open	Drawer width adjusts live across breakpoints; no layout jump or overlap	Not tested
TC59	Browser zoom 80%, 100%, 125%, 150%	Layout holds; text stays legible; no overlapping elements	Not tested

6.7 States and dark mode

ID	Test Scenario	Expected Result	Status
TC60	Dark mode — compact (S5)	Background #162034, cards #1C293C, text #F8FAFC, labels #94A3B8; elevation by border, not shadow	Not tested
TC61	Dark mode — expanded (S6)	Expanded layout under the dark token set; all text readable	Not tested
TC62	Dark mode — badges, buttons and totals	Badge, button (#C7D4FF text) and total colours use dark tokens; contrast is readable	Not tested
TC63	Empty Comments tile	Empty state with icon, "No comments yet" and helper text	Not tested

ID	Test Scenario	Expected Result	Status
TC64	Empty Attachments tile	Empty state "No attachments yet" with Upload attachment still available	Not tested

6.8 Edge and negative cases

ID	Test Scenario	Expected Result	Status
TC65	Post an empty comment	Input border turns red; one inline message "Enter a comment before posting."; nothing is posted	Not tested
TC66	Post a whitespace-only comment	Treated as empty — same validation, nothing posted	Not tested
TC67	Post a very long comment (1,000+ characters)	Existing length rule applies; text wraps in the list without breaking layout	Not tested
TC68	Record with $0.00 amounts (e.g. Total paid this month)	Shows $0.00, not blank or dash	Not tested
TC69	Very large amount (e.g. $492,332,414.55)	Formatted with thousands separators; fits in header and total rows without clipping	Not tested
TC70	Special characters in names (e.g. $%#$%#$)	Displayed as plain text, not interpreted; layout unaffected	Not tested
TC71	Missing optional field (e.g. no category, no memo)	Shows the agreed placeholder (—) consistently; row not collapsed or misaligned	Not tested
TC72	More than 10 transactions for the payee	Last 10 transactions tile shows exactly 10, newest first	Not tested
TC73	API error or timeout while loading the panel	Existing error handling shows; panel does not stay stuck on skeleton; Close still works	Not tested
TC74	Slow network (DevTools Slow 3G)	Loading skeleton shows until data arrives; no layout shift when content replaces skeleton	Not tested
TC75	Record deleted in another tab, then opened	Existing not-found handling; no blank or broken panel	Not tested
TC76	Double-click an action button	Action runs once (no duplicate clone, receipt or proof)	Not tested

6.9 Security and compliance (payments / PII)

ID	Test Scenario	Expected Result	Status
TC77	Bank and account numbers in the panel	Masked exactly as before the redesign (e.g. last 4 digits only); full numbers never shown	Not tested
TC78	Payee PII (tax ID, address, email, phone)	Displayed only to users with permission; masking unchanged from the previous view	Not tested
TC79	User without edit/delete permission opens a record	Edit and Delete are hidden or disabled in More actions, same as before	Not tested
TC80	Open another company's record ID via URL or API	Access denied; no data from the other company is shown	Not tested
TC81	Comment containing script or HTML (e.g. <script>alert(1)</script>)	Stored and shown as plain text; no script runs	Not tested
TC82	Upload a disallowed file type or oversized file	Existing upload validation rejects it with a message	Not tested
TC83	Download an attachment or document after logout	Download requires an authenticated session	Not tested

ID	Test Scenario	Expected Result	Status
TC84	Check browser console, network and URL	No PII or tokens logged in console or exposed in query strings	Not tested
TC85	Perform view, comment, upload and delete actions	Each action is recorded in the Activity log with user, device and time	Not tested

7. Regression scope

ID	What Will Be Checked	Expected Result	Status
RT01	Payment Out view page	Unchanged in layout, typography and behaviour	Not tested
RT02	Payment In view page	Unchanged in layout, typography and behaviour	Not tested
RT03	Shared /v4-detail-panel component on other modules using it	No visual or behavioural change on pages outside this task	Not tested
RT04	Payee list — search, filters, sorting, pagination, column visibility, export	Work as before	Not tested
RT05	Cash Expense list — Transactions / Cash Accounts tabs, totals, filters, pagination	Work as before; Total income and Total expense values unchanged	Not tested
RT06	Document Mail list and Document Mail History — filters and pagination	Work as before	Not tested
RT07	Values in view panels vs previous version (same record)	Every amount, date, name and status identical	Not tested
RT08	Actions — Clone, Get receipt, Send proof, Edit, Print, Download PDF, Delete	Same result as before (same API call, same output file)	Not tested
RT09	Create and edit flows for Payee, Cash Expense and Document Mail	Unaffected; newly created records open correctly in the new panel	Not tested
RT10	Sidebar navigation and Switch to classic version	Navigation to the four pages works; Classic view still available and unchanged	Not tested
RT11	Light / dark theme switch on list pages	List pages render correctly in both themes	Not tested

8. Traceability matrix

Acceptance criterion	Test cases	Regression
AC01 — follows UX design	TC01–TC10, TC29–TC38, TC60–TC64	—
AC02 — /v4-detail-panel structure	TC01–TC10, TC19–TC28	RT03
AC03 — consistent with Payment Out / In	TC11–TC18, TC49	RT01, RT02
AC04 — reuse V4 components	TC11–TC18, TC19–TC28	RT03
AC05 — spacing, typography, responsive	TC39–TC49, TC50–TC59	RT11
AC06 — business logic unchanged	TC65–TC76, TC77–TC85	RT04–RT10

9. Entry and exit criteria

Entry criteria

- OCW-24008 is dev-complete and deployed to the QA environment, with unit test evidence attached.
- The UX design for Payee and Document Mail view pages is available.
- Test data is available.

Exit criteria

- All test cases and regression checks executed.
- No open Critical or High defects; Medium/Low defects agreed with the PM for later fix.
- Typography and responsive checks pass on all four pages.
- QA test report delivered with Status: QA Pass.
