QA TEST REPORT

OCW-24680 — Language Setting: Label and Tooltip Clarification

Module: Settings — General Settings · Environment: Dev test link (staging backend) · 13 Oct 2026

> **Purpose:** Confirm that the General Settings "Language" field is renamed to "Check Amount-in-Words Language", keeps the English and French options, and shows a tooltip explaining that it only affects the check amount in words.

Task Details

Field	Detail
Task ID	OCW-24680
Module	Settings — Application Settings → General (V3 classic and V4 / Version 2.0)
Features	Language field label, tooltip, English/French options
Environment	https://ocw-24680-hari.web.ocw.sebipay.com (branch OCW-24680-HARI) on the staging API · Chrome, 1920 px
Status	QA Fail

Task Overview

Users assumed the "Language" setting changes the application language, when it only controls the language of the check amount in words. The task asks for the field to be renamed, the English and French options to be kept, and an explanatory tooltip to be added. Both V3 and V4 General Settings were tested. The tooltip is in place in both versions and the options are unchanged, but the field label still reads "Language" in both versions, so the rename has not been implemented.

Issue / Requirement Description

- Reported: the "Language" field (English / French) under Settings is confused with the application language. It only sets the language of the check amount in words.
- Requirement: rename the field to "Check Amount-in-Words Language".
- Requirement: keep the existing English and French options.
- Requirement: add a tooltip. Suggested text: "Select the language used to write the check amount in words. This setting does not change the application language."

Updates / Changes Implemented

- An info icon is added next to the field label in V3 and V4. Hovering it shows a tooltip to the right.
- The field label is unchanged: it still reads "Language".

Testing & Verification

V4 (Version 2.0) — Settings → App Settings → General

- Verified that hovering the info icon shows: "Select the language used to write the check amount in words. This setting does not change the application language". This matches the suggested text, except that the final full stop is missing.
- Confirmed that the dropdown still lists English and French, and the saved value (English) is unchanged.
- Observed that the field label reads "Language *", not "Check Amount-in-Words Language".
- Confirmed that no console errors appeared.

V3 (classic) — Settings → Application Settings → General

- Verified that the same tooltip appears on hovering the info icon, with the same text.
- Confirmed that the dropdown still lists English and French, and the value is unchanged.
- Observed that the field label reads "Language *".
- Confirmed that no console errors appeared.

No settings were saved during testing: the dropdown was opened to check the options and closed without changing the value.

Test Cases Executed

ID	Test Scenario	Expected Result	Status
TC01	V4 tooltip on the info icon	Tooltip explains the setting only affects the check amount in words	**Passed**
TC02	V4 English and French options	Both options available; value unchanged	**Passed**
TC03	V4 field label	Label reads "Check Amount-in-Words Language"	**Failed**
TC04	V3 tooltip on the info icon	Tooltip explains the setting only affects the check amount in words	**Passed**
TC05	V3 English and French options	Both options available; value unchanged	**Passed**
TC06	V3 field label	Label reads "Check Amount-in-Words Language"	**Failed**
TC07	Console errors on General Settings (V3, V4)	No errors	**Passed**

Defects Found

Case	Defect	Severity	Bug	Status
TC03, TC06	The General Settings field is still labelled "Language" in V3 and V4. The ticket requires it to be renamed to "Check Amount-in-Words Language".	Medium	—	**Open**
TC01, TC04	Minor: the tooltip text is missing the final full stop ("… does not change the application language").	Low	—	**Open**

Conclusion

The tooltip has been added in both V3 and V4 General Settings and explains that the setting only controls the language of the check amount in words. The English and French options are unchanged, and no console errors appeared. However, the field is still labelled "Language" in both versions, so the required rename to "Check Amount-in-Words Language" is not implemented. The task should go back to development for the label change.
